

## ELITE NOVO FORCE

£179.99 [www.madison.co.uk](http://www.madison.co.uk)

**T**he Novo Force definitely gets the nod for design, with its simple colour scheme and space-age legs making it look more like something NASA might have created. It's got five levels of magnetic resistance, controlled by a dial that sits on the bars, and assembly out of the box is pleasantly simple. The oversize handle to lock the bike in place is nice too, requiring less force than some of the other trainers tested. Noise level is excellent for the price point and the ride is smooth, although there's a little jerkiness when you accelerate sharply. We're also big fans of Elite's elastogel rollers and have found them to be

far kinder to tyres in the past, especially if you don't have a dedicated turbo tyre. Roller position is excellent, moving towards the rear of the tyre, meaning that the wheel sits lower and you don't need a riser block at the front.

### VERDICT

Top value turbo that does plenty for most winter training needs
