

## TECHNICAL SPECIFICATIONS

- Capacity: 550 ml  
750 ml  
950 ml
- Diameter: 74 mm
- Weight: 54 g (550 ml)  
57 g (750 ml)  
68 g (950 ml)
- Dishwasher safe (T. max = 40°C).
- Maximum liquid temperature 40°C.

## MATERIALS

- Bottle body: Innovative plastic material.
- Cap: Food-grade Polypropylene and food-grade Thermo Plastic Rubber.

## FEATURES

### RECORD LIGHTNESS

- Design and production were implemented to achieve a record lightness. The new 550ml FLY bottle is the lightest sport bottle available worldwide thanks to its thickness which varies according to the specific functions of each single part.

### INNOVATIVE MATERIAL

- Exclusive odorless, soft and durable plastic material, the result of an experimental

research project realized by Elite.

### UNIQUE DESIGN

- The bottle features a new and immediately identifiable sport-like design. Its standard 74 mm diameter, allows you to use it on all traditional bottle cages available on the market. On the upper part, the bottle body presents a recess which improves the stability of the product in the bottle cage during the race.

### NEW CAP

- The cap has an ergonomic design and it is multi-material made. It guarantees an increased and easier liquid flow thanks to the valve which is soft, odorless and will not alter the taste of the liquid.
- Ideal for competitions as it features:  
\_A larger push-pull soft valve for maximum ergonomics and ease of opening and closing while cycling.  
\_Quick and easy unscrewing to clean and refill the bottle

### IDEAL GRIP

- The surface of the bottle's body features a special grip which makes it safer and easier to use under all conditions (competitions, off-road...).

### SQUEEZABLE

- Bottle body is very soft and liquid flows easily by just applying a light squeeze.

### CONVENIENCE OF USE

- The bottle is equipped with a 20% increased opening compared to standards for easier filling with liquids and/or powdered supplements, also making bottle washing easier.

### FOOD CONTACT CERTIFICATION

- The bottle is in compliance with the European CE and American FDA standards concerning food contact materials.

### BPA FREE

- Bottle components are totally BPA-Free (Bisphenol A).

### EXCELLENT CAPACITY

- While featuring a more compact design, the bottle provides an optimal 550 ml supply of liquid during the race with reduced encumbrances, particularly useful on sloping frames or when two bottle cages are mounted on the bicycle.

### RECYCLABILITY

- All materials used are 100% recyclable through normal recycling channels.
